PROJECTS

LIGHT OF JUSTICE 3D

- Worked with a team to design and develop an animated project by creating the 3D Background using Blender.
- The project will identify the audience, create characters and visuals, combine 2D and 3D animation, and check if the finished film is effective through audience feedback.
- The Main Goal of this Project is to determine how animation is visual storytelling can communicate important SDG 16
- The story uses fantasy to show real-world problems like corruption, discrimination, and loss of identity.

LIGHT OF JUSTICE 2D

Worked with a team to create the storyboard, the 2D Background, & the Inn Room.

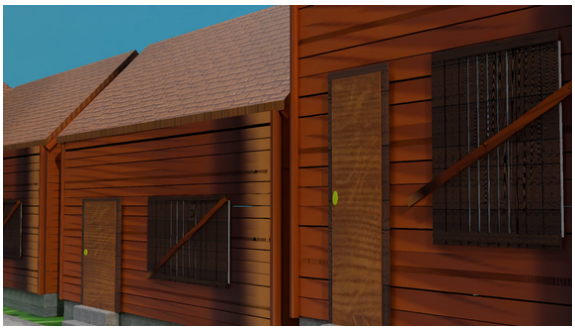

SOGNO

Worked with a team to design and develop a picture book project by designing a character and coloring a page of the book
